ABOUT ME

My name is Luciano Martin Perez, I'm from Buenos Aires, Argentina, and I am a Software Engineer with over 2 years of experience in IT, currently working at Ensolvers. I specialize in technologies such as Java with Spring Boot and React with TypeScript. I am currently in my third year pursuing a Bachelor's degree in Systems at Universidad Nacional de Lanus. I am a dedicated professional committed to continuous learning and personal and professional growth, always focused on improving my skills and delivering high-quality results in every project I contribute to. I am interested in Backend or Fullstack Software Engineer roles.

PROFESSIONAL EXPERIENCE

Software Engineer

April 2024 - Current

Ensolvers

- Develop backend APIs with Java and Spring Boot, including unit and integration tests to ensure code quality.
- Monitor application performance using cloud services like AWS or New Relic, proactively identifying and implementing improvements that significantly increased backend performance.
- Implement asynchronous data processing using Apache Kafka in a high-load application handling over 10,000 requests per minute, enhancing system scalability and responsiveness.
- Manage data and optimize database engines such as MySQL and OpenSearch for efficient querying and storage.
- Proactively identify and fix bugs, delivering hot-fixes to production to maintain application stability and minimize user disruption.
- Develop UI views with React and TypeScript based on provided designs, following best practices.
- Lead team efforts by coaching new members, conducting sprint plannings, and assigning tasks to ensure efficient delivery within a team of 6 members.
- Coordinate with Product and Support teams to define sprint goals, prioritize tasks, and align on business objectives.

Functional Analyst

May 2023 - April 2024

Mercado Libre (Vendor) | Voolkia Software & Services

- Developed new scraping and product matching strategies to enhance data analysis effectiveness.
- Conducted product validation and review across multiple platforms to ensure data accuracy.
- Collaborated with cross-functional teams to align efforts and optimize processes.
- Committed to continuous process improvement and optimization to boost efficiency.
- Created and managed comprehensive documentation for knowledge sharing and process clarity.

SKILLS

Technologies: Java, Spring Boot, MySQL, OpenSearch, Hibernate, JPA, Apache Kafka, Redis, Memcached, React, TypeScript, AWS (CloudWatch, S3, EC2), New Relic, Mockito, JUnit, Git, Jira.

Soft Skills: Proactivity, Teamwork, Communication, Problem-solving, Time management

EDUCATION

Bachelor's Degree in Systems

March 2022 - Current

Universidad Nacional de Lanus

First Certificate in English (Cambridge)

March 2012 - June 2021

Knightsbridge School of English

- B2 Level - Score 174

PROJECTS

Sports Events System

 [Repository](#)

Built a Java-based sports event management system for matches, teams, stadiums, divisions, and cities.
Technologies: Java, Spring Boot, MySQL, Angular, Typescript, Hibernate,

Portfolio

 [Repository](#)  [Deploy](#)

A website where you can find my projects, and information about my skills and experience.
Technologies: HTML, CSS, Javascript,

Notes App

 [Repository](#)

Built a Notes Single Page Application, with different functionalities.
Technologies: Java, Spring Boot, Hibernate
